Organic biological controls for cannabis cultivation (where legal) with no harmful residues, for pest management and plant health.

BIO WITH A BITE

FUNGICIDE AND PLANT HEALTH

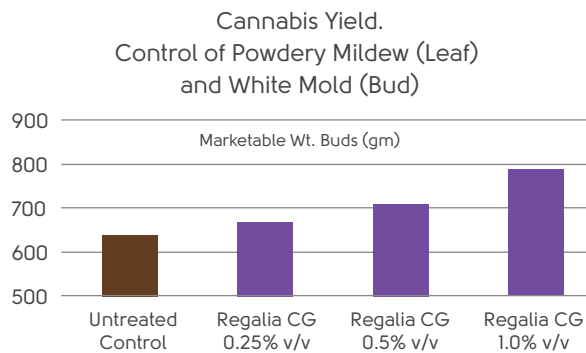

Powdery Mildew | Pythium Rot | *Botrytis*

Use early for disease prevention and overall plant health, and late in season to avoid issues of pesticide residues at harvest.

- Better yield and harvest quality
- Quality control tested to ensure no human microbial pathogens
- Natural ingredients stimulate plant immunity and fight disease

Can be mixed with either Grandevo CG or Venerate CG.

EARLY SEASON BIOINSECTICIDE

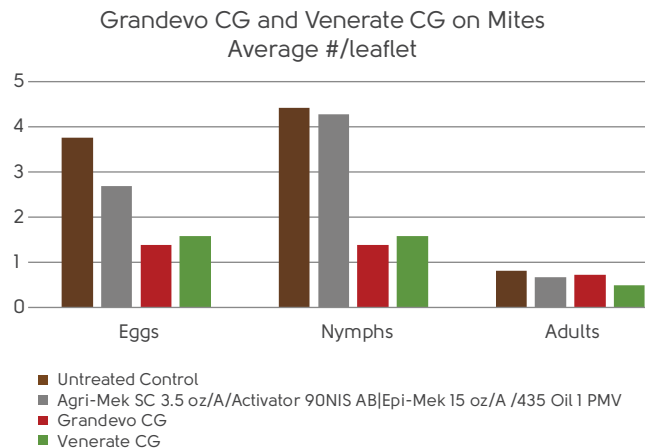

Spider and Russet Mites | Thrips | Aphids

It's best to prevent problems before they do major damage. Alternate with Venerate CG if infested.

Start applications early, as a preventative, before infestation levels are high, continue in a strong IPM program with Venerate CG.

Tank mix with Regalia CG and alternate with Venerate CG.

IN SEASON INSECT CONTROL

Spider and Russet Mites | Thrips | Aphids

Apply weekly for a strong IPM program to manage key pests like spider mites, russet mites, thrips and aphids. Use 5 tbsp/gal rate if russet mite pressure is high.

Tank mix with Regalia CG and alternate with Grandevo CG.
