

Millennium Ultra²

HERBICIDE

PREMIUM PERFORMANCE FOR ULTRA RESULTS.

Millennium Ultra[®] 2 is a premium post-emergence herbicide that provides extraordinary control of challenging broadleaf weeds including clover, speedwell, henbit and chickweed. Since Millennium translocates to the roots, even deep-rooted perennials such as thistle, goldenrod, artichoke and nettle are no match for its power. Millennium Ultra 2 is your premium weed control option in athletic/recreational fields, cemeteries, sod farms, golf courses, industrial sites, non-cropland, rights-of-ways and roadsides. Plus, Millennium is easy on Milkweed, which makes it an ideal weed solution for pollinator areas.

COMPETITIVE ADVANTAGES

INNOVATIVE CHEMISTRY. MAXIMUM PERFORMANCE.

- Weeds “melt” out of the turf
- Gentler on milkweed, allowing plants to bounce back after initial suppression
- Excellent control of the hardest-to-kill weeds including thistle, speedwell and plantain
- Unparalleled clover control
- Innovative chemistry for rapid response and maximum performance
- For use throughout the growing season
- Specifically formulated for commercial turf
- Tank mix compatible with most liquid fertilizers and iron formulations*

*Compatibility test required

 Vetch
 Virginia buttonweed
 Woodsorrel
 Yarrow

MONARCHS, MILKWEED, MILLENNIUM ULTRA 2

SAVE MILKWEED WITH MILLENNIUM

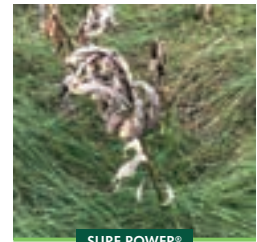

Unlike other selective herbicides, Millennium Ultra 2 is easy on milkweed. Milkweed provides habitat for monarch butterflies, which makes Millennium Ultra 2 a natural fit for weed control in pollinator zones.

UNTREATED

MILLENNIUM ULTRA² + NIS*

SURE POWER[®]

*Use of an organosilicone surfactant may increase control of milkweed with Millennium.

USE SUMMARY

RATES: Maximum Individual Application Rates

Cool-season grasses.....2-3 pts/Acre
 Bentgrass (except golf course greens and tees)..... 1.5-2 pts/Acre
 Warm-season grasses.....2-3 pts/Acre
 Limited to two applications per year.

Maximum 4 pints of product per acre per application.

Maximum seasonal rate is 8 pints per acre excluding spot treatments.

For sod farms, use a minimum of 21 days between applications.

See label for complete directions for use.

APPLICATION RESTRICTIONS

Do not use on residential turfgrass. Do not collect grass clippings for mulch or compost. Do not send clippings to a compost facility. Applicator must give notice to landowners/property managers to not use grass clippings for mulching or composting.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

See label for complete application restrictions.
