

## Don't Let Winter Winds Desiccate Your Turf

The cold, drying winds of winter months can be damaging to exposed turf and plants, robbing them of essential leaf moisture they need to survive the season. Give your plants the protection they need with LeafShield.

LeafShield provides safe, effective and affordable protection against desiccation injury. When applied to turfgrass or landscape plants, it dries to a thin, flexible layer that will not discolor turf or plants.

### Safe, economical and easy to use.

LeafShield is odorless, non-sticky, and mixes easily with water. It washes effortlessly out of spray equipment with soap and water so cleanup is a breeze. It can be applied in sunny or cloudy conditions, further increasing ease of use.

- **Costs less than similar products.**
- **Protects turf against desiccation injury.**
- **Safe for use on all turf and plant types.**
- **Stays flexible and will not discolor foliage.**
- **Will not clog nozzles or damage sprayer pump seals.**
- **Economical enough for fairway protection.**

Spray LeafShield at 2 oz/1000 sq ft with a spray volume of 1 – 2 gal/1000 sq ft. LeafShield can be safely tank mixed with contact snow mold fungicides. Do not tank mix LeafShield with PCNB or localized, acropetal or systemic penetrant snow mold fungicides.

INNOVATE. IMPROVE. INSPIRE.
