

PRODUCT OVERVIEW

EVOFACTOR™

Powered by **OPUSMAX™**

EVOFACTOR is a proprietary nutrient adjuvant that improves fertilizer efficiency and promotes nutrient availability to plants. Evofactor's mode of action relies on **OpusMAX**, which takes the nutrients found in fertilizer and creates supramolecular structures, facilitating localization and stability.

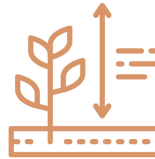

EVOFACTOR COMPOSITION

- Isotridecanol, ethoxylated
- Constituents ineffective as an adjuvant
- Powered by OpusMAX

Environmentally friendly

Get the most out of your fertility program and increase nitrogen-use-efficiency with Evofactor.

Better nutrient uptake

Evofactor has demonstrated increases in nutrient uptake, giving plants a healthier start.

Increasing profit per square foot

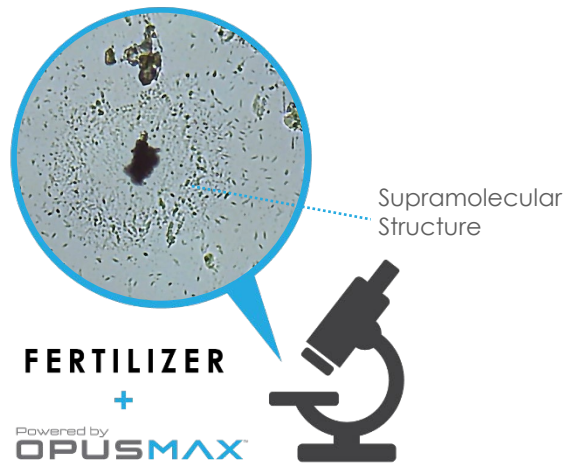

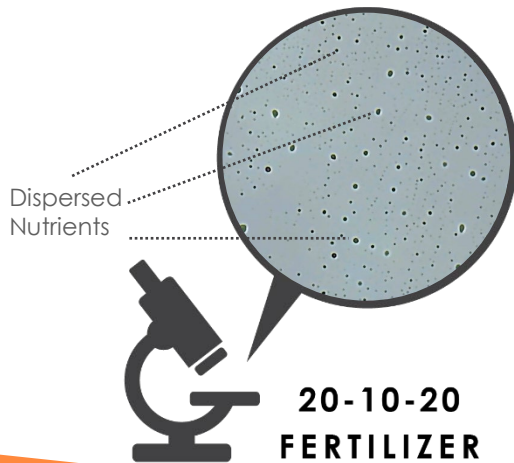

Evofactor can help deliver increased biomass, for a higher ROI on your fertilization program.

Free up storage space

- A single case (5 gal) of Evofactor could replace up to 750lbs (30, 25lb bags) of water-soluble fertilizer.
- A single pallet (180 gal) of Evofactor could replace up to 28,000lbs (14 pallets) of water-soluble fertilizer.
