

ProGreen Plus

22-0-6 with EPEC

For consistency and results, Turf Mangers turn to ProGreen Plus Professional Turf Fertilizer with EPEC® controlled-release fertilizer.

EPEC coated nitrogen contains the latest in polymer-coated technology that delivers reliable nutrient release with lower potential for nitrogen loss from leaching or volatilization.

40% EPEC, 2-MONTH FEEDING

FEATURES

- Reduced likelihood of growth flushes and burn
- Release regulated by soil temperature and coating thickness
- Environmentally responsible with lower potential for nutrient leaching, denitrification, runoff, or volatilization

CONSISTENT. RELIABLE. PRECISE

KEY BENEFITS

- Quick greening
- Provides long-lasting feeding
- Potash to enhance turf health and root development

| 22-0-6 | SGN | Net Weight | Coverage | Application Rate Per 1,000 sq. ft. | Nitrogen Per 1,000 sq. ft. |
