

Relay Box

ARBAM

BARTLETT

— INSTRUMENT COMPANY —

Relay box for interfacing between a Bartlett RWL Controller and 120VAC vent motors!

The ARBAM simplifies the installation of a Bartlett natural ventilation controller with proportional outputs (RWL11X2 and GHK12X2C) by allowing the user to have an independent relay box for the vents. Override switches allow for easy manual operation for testing and trouble shooting.

The ARBAM has options for...

- Two 3 wire motors (120V or 240V single phase)
- Limit switch connections
- Inflate motor control option available
- Customizable to work with one 4 or 5 wire motor (120V or 240V single phase)
