PACK MANUFACTURING COMPANY DRIVE LINE CONVEYORS

Drive Line Conveyors are a dependable and economical solution to product transport in any nursery or greenhouse operation. Drive Line Conveyors consist of a main powered Lead Conveyor and up to six Follower Conveyors that are driven by the Lead Conveyor. This reduces the number of power connections required to drive conveyors in out-of-the-way places. Drive Line Conveyors are durable, and multiple options are available to custom build the line to your needs, including mounting options and custom features.

Drive Line Conveyors are available in 3 meter and 6 meter lengths.

Each length is available in 25 cm and 45 cm widths.

Two 12" supports come with each section, both Lead and Follower sections. Custom mounts and leg options are available for practically any configuration.

Aluminum construction and durable V-Guide belts provide dependable service.
