MAST YOUNG PLANTS

WELCOME to our 2022-2023 Mast Young Plants Spring Liner Catalog! Building your spring 2023 program is like putting a puzzle together. Each decision, from choosing plants your customers always come back for plus adding new varieties that capture the attention of buyers who love the novel and new, to calculating grow times and selecting and scheduling shipping options adds pieces to the program puzzle. You can count on Mast Young Plants' quality products and exceptional service as you build your program piece by piece.

SOLVE With a wide range of product size offerings - 51, Mega50, 1801, prefinished 4" and prefinished 10" hanging baskets, Quick Blocks - MYP offers solutions for your grow time needs

VALUE Featuring a full assortment of only the best varieties from the top breeders in the country, use our all-inclusive catalog for one-stop shopping

INSPIRE Browse our extensive collection curated for quality and variety, and mix and match industry favorites with exciting new varieties all tested and trialed by our Innovating Department

DESIGN Let our "Living Catalog" trial garden and its 400+ unique combinations inspire you to create masterpieces that delight your customers

MAXIMIZE Invest in plants rather than freight with our innovative shipping solutions, multiple box sizes and master boxes, truck deliveries, and combined shipping options

FOCUS supplying your customers with beautiful, quality plants is your top priority, and you can build your program with confidence knowing that we have trialed and tested each of the varieties in our catalog

It is a pleasure to offer you this collection, and we wish you continued success growing your greenhouse business in 2023.

BOOKING YOUR ORDER EARLY?

Receiving MYP's catalog in July gives you time to plan your season and book your orders. This booking cycle begins at the end of July for orders shipping weeks 40-20. Give your growing season a successful start by booking your order early and taking advantage of these benefits:

EARLY ORDER DISCOUNT (EOD)

An early order discount (EOD) lowers the cost of your plants and applies to all orders booked by October 31, 2022. We recommend placing as much of your initial order as early as you can. You can always add product later if you make additions or changes to your program but ordering early ensures that the bulk of your order is confirmed with the EOD pricing.

SELECTION AND AVAILABILITY

Good availability earlier in the season means it's more likely you'll get your entire order confirmed. Our trays are grown to order, and we book orders with the cutting suppliers after receiving them from brokers and customers. Suppliers have a limited number of cuttings, and once they are gone, we cannot get more.

ORDER PROTECTION

Booking early helps to provide a buffer on your order from unexpected shortages arising during the production season. Cuts are generally made on orders most recently booked before a ship week.

DEER RESISTANT

Research demonstrates these varieties to be less desirable to deer.

SEASON EXTENDERS

We grow every plant in our trial gardens all summer long, so we're confident these plants perform best in summer's heat.

MYP BEST SELLER

These varieties are top sellers and ones that you can feel confident will do well for you too!

NEW

These plants performed so well in our trials that we're offering them to you in our catalog this year!

MAST YOUNG PLANTS EXCLUSIVE

Through our relationships with our top breeders, we secure the rights to selling a new variety to the general public one year before it becomes available to everyone. Be the first to try these out in '23!

SMALL POTS

These varieties can be grown pot tight on the bench for high density production.

MOUNDING HANGING BASKETS

These varieties grow more upright producing baskets which do not require sleeving.

TRAILING HANGING BASKETS

These varieties will spill down over the edge of the pot. Ideal for large premium baskets.

VINES

Climbers, fillers, and trailers! These varieties are great for trellises, baskets, or deco pots!

MYPX

MYP EXCLUSIVES

NEW ITEMS OFFERED EXCLUSIVELY AT MAST YOUNG PLANTS IN 2022/2023

KWIK KOMBO™ BLUEBERRY TWIST™

Featuring three summer hardy reliable varieties, Petunia Dekko™ White, Petunia Shortcake™ Blueberry, and Verbena Lanai® Lavender Star. Purples and whites all blend to give summer long interest and color.

MYP Innovating Department trialed Blueberry Twist during the summer of 2020 and was impressed with its season long performance. Syngenta Flowers partnered with MYP to offer this as an exclusive for 2021-22 and after strong sales extended this exclusive for 22-23! If you missed this one last year, make sure you try it out for spring 2023!

KWIK KOMBO™ RASPBERRY TWIST™

The Star of Blueberry Twist™ - Shortcake™ Blueberry - has a new “sister” variety called Shortcake™ Raspberry that is in this mix.

Syngenta is adding Raspberry to the Shortcake™ series so we added a companion Kwik Kombo™ featuring this new variety.

We are excited to bring you this combination as an exclusive in the Mast Young Plants rooted liner program!

DURABELLA® THE KING

MYP is excited to add two new first to market DuraBella® Combos to our program. This combo debuted at CAST 22 and was very highly regarded by visitors.

The star of this combo is the uber popular Petunia Amore® King of Hearts and it blends well with Verbena Vanessa™ Red, and Bacopa Scopia® Gulliver™ White Improved.

DURABELLA® THE QUEEN

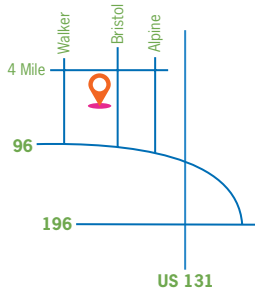

The second first to market DuraBella® Combo in the MYP 22-23 program!

This combo also scored high with CAST 22 visitors.

The star of this combo is the even more popular Petunia Amore® Queen of Hearts and it blends perfectly with Calibrachoa Lia™ Yellow, and Verbena Vanessa™ White.

OUR LIVING CATALOG:

What's better than this catalog full of pictures of beautiful plants? A living catalog you see, smell, and touch by browsing through aisles and acres of beautiful plants! We call our garden a "living catalog" because we field trial the varieties that we offer in our program. Doing so allows us to see plants' performance in actual garden conditions, compare genetics across varieties, evaluate new introductions, and appraise the performance of novel combinations.

Our trial garden gives you confidence in your selections. Rather than choosing varieties for our program from breeder photo galleries, we carefully select only the varieties that meet our high standards for quality and which we are confident we can grow well for you. We invite you to follow along with garden updates on our website and on Facebook, Instagram, and LinkedIn. Our 2022 Trial garden report will be published to our website in October. Check back then to see which of these **new for 2023** varieties really stood out this summer!

3525 Bristol Avenue NW
Grand Rapids, Michigan 49544

Monday through Friday
8am - 4pm

Mid-July through mid-September

We are eager to connect people with plants by welcoming back customers, sales representatives, and breeders this summer. Our garden is open to the public from July through September and is fully staffed during the Michigan Garden Plant Tour from **July 25 – August 5, 2022**.

We look forward to hosting you this summer! Drop-in visitors are welcome, and for a more personalized experience we encourage visitors to schedule a visit by contacting our office. Make plans to see your 2023 plants in our "living catalog" this summer!

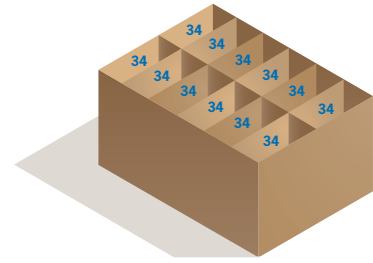

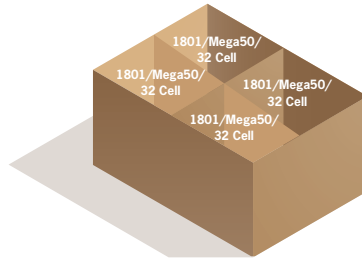

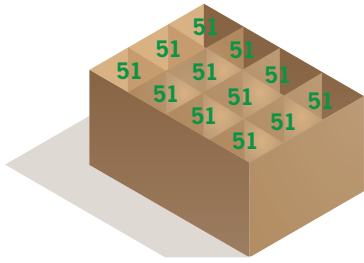

OUR 2022 TRIAL GARDEN WILL FEATURE:

- 500 unique and custom designed hanging baskets, deco planters, and window boxes designed by MYP head grower Michael DeBerti, who presented on this topic at the American Hort Finished Plant conference as well as at the Mid Ohio's Grower Meeting
- 130+ new for 2023 items from the top industry breeders
- Comparison design with similar varieties clearly labeled and grown side by side in garden beds and containers
- AAS trial garden
- Shaded seating area with wireless internet available
- 2022 Feature Trial: Italian breeder Lazzeri is bringing a trial of their genetics to North America and you can see them at MYP
- 2022 Danziger Feature Trial – Yes, we have two features this year! Come get a glimpse of the future as we partner with Israeli breeder Danziger, who will display, for the first time ever to the public, a trial showcasing 2-3 years of upcoming genetics
- Visitors will vote for favorites in multiple different breeder trials
- Friendly and knowledgeable staff to assist you and answer your questions

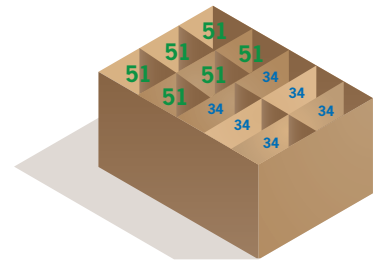

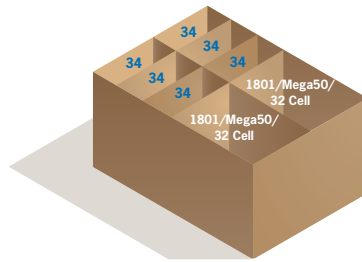

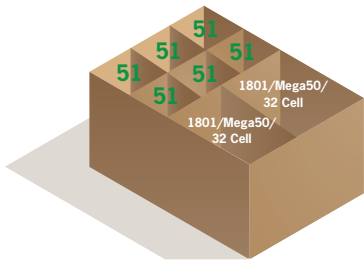

THE COMPLETE PACKAGE

THE STANDARD BOX Packaging Specs

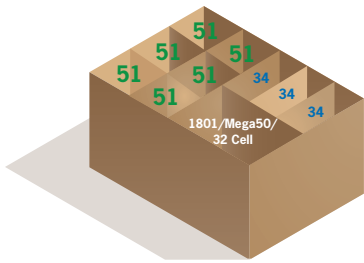

1 Standard Box filled with 1 tray size

1 Standard Box filled with 2 different tray sizes

1 Standard Box filled with 3 different tray sizes

Actual Standard Box showing product from side

Standard Boxes billed by box, not by tray!

0	or 0	+ 6
6.25" inserts	6.25" inserts	4.25" inserts

288 Dracaena Spikes fit 3 trays per Half Box

THE MASTER BOX

Actual Master Box on a pallet jack

Master Boxes are 48" long by 48" wide and can be anywhere from 21" tall (single stack box) to 48" tall (double stack box) to 70" tall (triple stack box). The weight is anywhere from 150 lbs up to 467 lbs based on the size of the order.

Master boxes are delivered by the Fed Ex Freight service. In most cases a loading dock, forklift or skid steer is required to be able to off load the Master Box from the Fed Ex semi-truck.

Any orders that exceed 3 Standard Boxes, MYP will automatically ship in the Master Box unless otherwise specified by the recipient. Freight is billed per tray.

MYP TRUCK

An MYP truck is a semitruck with a temperature-controlled trailer. Trays arrive on blanket-covered CC carts that must be off loaded at the time of delivery. CC carts cannot be left at customer's facility. Freight is billed per tray. Please refer to our Ordering Guidelines for the MYP Truck Delivery Schedule and minimum order requirements.

The CC carts are on a wheeled base so they do not require a forklift to move them. The dimensions are: 22" wide X 53" long X 81" high.

LINER TRAY SIZES

51

Grown as 51
Sold as 50 (25mm)

Our most popular tray size, you will find the most varieties available in this size. Vegetative items are in Ellepots and seeded varieties are in loose fill.

QUICK START

As a young plant supplier, we love rooting cuttings and shipping them to you. We also love providing innovative solutions that meet your growing needs.

We know that some crops need time to reach maturity, and that time may be longer than you prefer to run your heaters. Our Quick Start program utilizes our warm greenhouses, already heated to propagate young plants, to start your long-term crops for you. We'll put those first few weeks of growth on your long-term crops, saving you both heating costs and time.

After trialing and testing this program for several years, we are pleased to introduce these Quick Start varieties in 4" 10 pack trays and 10" white hanging baskets:

- Zonal Geraniums
- Tuberous Begonias
- Elatior Begonias
- Rex Begonias
- Solenia Begonias
- Fuchsia
- Boston Ferns
- Dipladenia
- Cordyline

Since these more mature plants take up additional truck space, we suggest ordering Quick Starts pots with your last shipment of young plants, which is week 14 to the East and week 15 to the West.

We offer customer pick up as well as Grower Truck for Quick Start orders. We do not ship via FedEx for this program.

INTRODUCING THE “QUICK BLOCK”

- Tried with positive results in spring 2019 and 2020 both internally and with customers.
- This is an innovative new product line by MYP that allows growers to turn combos even faster!
- Featuring Syngenta and Selecta One genetics, we have made our triple stuck liners BIGGER and much more impressive.

QUICK BLOCK SPECS

- Each Quick Block contains a mix built from three 25 mm liners that are 4-5 weeks old.
- The program is built on trusted breeder mixes and includes one mix, Blueberry Scramble, that takes two trusted Syngenta varieties and combines with an accent plant to give a truly unique combination!
- Quick Blocks are made up of compressed coco fiber. When watered they absorb and increase in size. They come in a very attractive clear plastic tray. Each Block contains a variety label to be used when putting in your finished container.
- Plugs are planted into the Quick Block and grown for an additional 4 weeks where they get one more pinch and a B9/Florel spray application. Each of these steps are done to make sure the liners are ready to branch out, and quickly fill your finished containers after transplant.

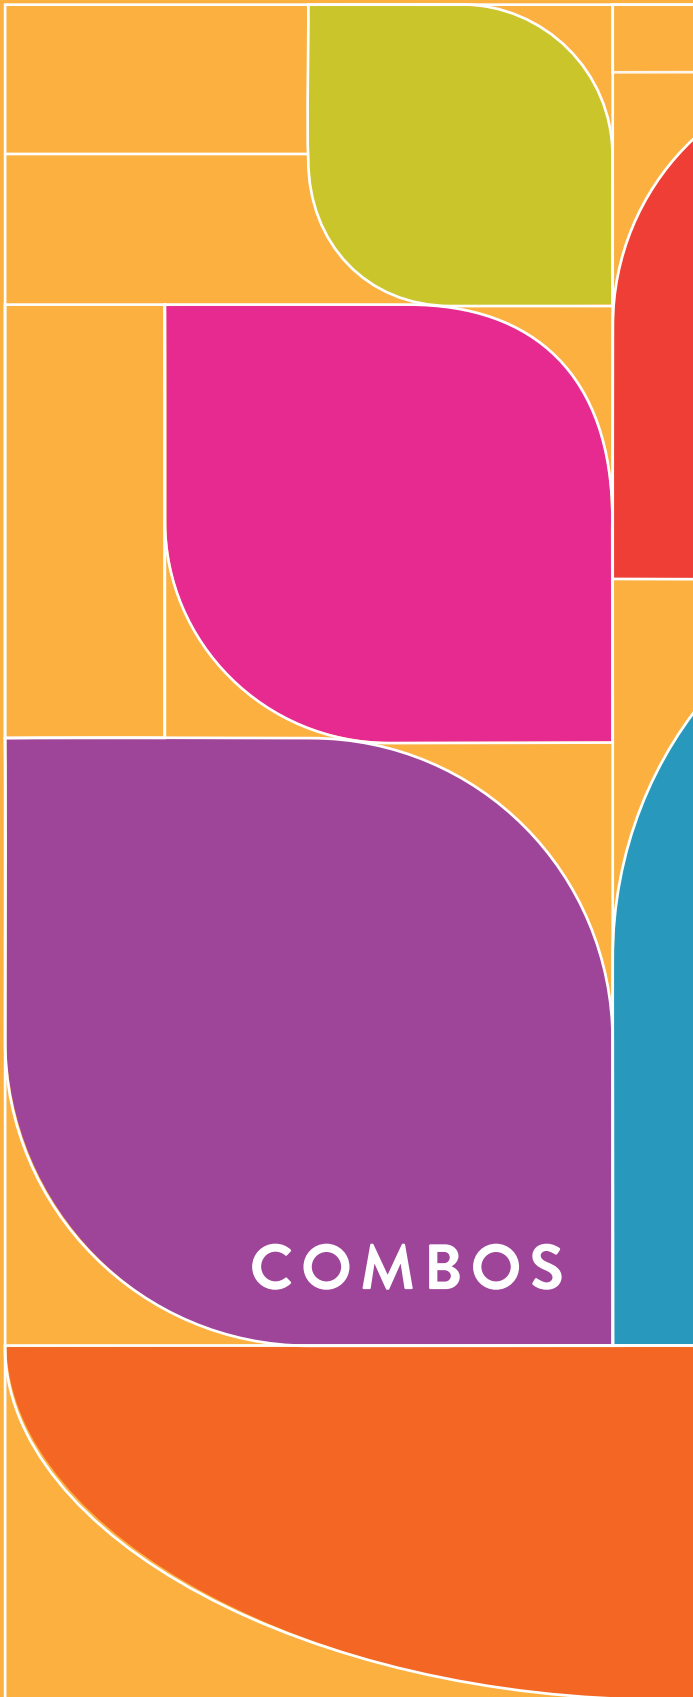

FINISH TIMES

- 10” container – 1 Quick Block per pot for 4 weeks.
- 12” container – 1 Quick Block for 5 weeks or 2 Quick Blocks for 4 weeks.
- 14” container – 2 Quick Blocks for 4-5 weeks.
- Don’t forget! Quick Blocks are ready to sell, and make an attractive package at retail for your customers who want to take them home and create their own combo pots.

ORDERING AND SHIPPING INFORMATION

- Minimum order is 6 Quick Blocks as 6 Quick Blocks make up 1 shipping unit.
- Our half box holds a total of 12 Quick Blocks.

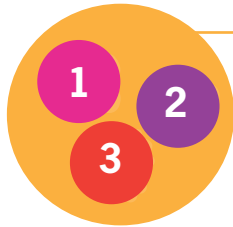

COMBO PLUG RECOMMENDATIONS

Through our trialing process, here are some suggested guidelines for Trixi®, Kwik Kombos™, and Confetti Garden™ liners:

12" HB	3 plugs per pot takes 8 weeks at 68°F average
12" HB	4 plugs per pot takes 7 weeks at 68°F average
10" HB	1 plug per pot takes 9 weeks at 68°F average
10" HB	2 plugs per pot (close together in the center) takes 8 weeks at 68°F average
10" HB	3 plugs per pot takes 7 weeks at 68°F average
