

**PLANT SOURCE**  
INTERNATIONAL

2022-2023

2022-2023

## **25 YEARS STRONG AND STILL GROWING**

Plant Source International has grown from a very small collection of products and minimal production to now having a wide range of items that can serve a wide range of customers. Being that PSI is an independent producer of URCs, it allows the opportunity to grow and adapt to better provide for the market's desires. PSI Mexico is building additional greenhouses to better serve and meet market demands.

COVID-19 has been a mixed blessing for many of us in this industry. We have lost people special to us, yet it has been a time of revival for our industry as society has rediscovered the pleasure of growing flowers and edibles. Fortuitously, it has caused the next generation of gardeners to stop and learn about the benefits of having plants around the home. How we continue to connect and cultivate these new customers will be the challenge we must all contemplate and work towards accomplishing.

Looking back over 25 years of PSI, it would not be achievable without the extraordinary efforts of so many wonderful employees in Mexico and the USA. I want to thank and affirm all the actions of Mauricio Paniagua, General Manager and Business partner in Mexico, who has done all the hard work to make this possible. In the office, Linda Strandlund has streamlined, organized, and daily managed the order process, shipping, and all other challenges with fantastic talent. I want to thank them and everyone else working at PSI for making us into the company we are today.

The excitement for the following season's introductions is building as we have many new items, including a significant group from the Hort Couture program, primarily Coleus. We continue to search for our grower and retailer customers' genetics of interest and desire. This year, a broader selection of unique Tradescantia varieties is available through our partnership with D.S. Cole to add production of the Zebra collection that Doug had collected over the years. Herbs have continued to be a mainstay in the PSI program, and this year we are adding some new patented items from Volmary that look very interesting and unique. Please take a look at all the latest offerings, as we're confident that you'll be as excited to add them as we have been.

Wishing you a great season ahead and 25 more years of fun.

Troy Lucht

# GERANIUMS

As the premier provider of regal and scented geraniums to the North American market, our growers have perfected both the harvesting and shipping of our top quality unrooted cuttings to give you ultimate success in rooting for a strong start in your production.

# ANGELEYES® REGAL GERANIUM

## **Pelargonium domesticum**

Angeleyes Blueberry brings a unique flower form unlike any other in the class. The blooms have a rich, velvety appearance like a regal, but are born in a single, viola-like form. The energy efficient crop can be grown cool in the spring, and will continue to bloom for the consumer throughout the summer. Plants look best in small container sizes like 306-packs and 4-inch, but can be done in larger pots and patio containers.

ANGELEYES® Blueberry  
Regal Geranium

# ORANGE GLOW® REGAL GERANIUM

## **Pelargonium crispum**

A very novel color for the genus, Orange Glow boasts a bright orange petal with rich dark centers. The vivid color really stands out from the crowd and makes a stunning display as it freely flowers for many months and has great tolerance to the summer heat. The plants have fantastic vigor and will be impressive in large containers and patio planters.

ORANGE GLOW®  
Regal Geranium

# PINKERBELL® GERANIUM

## **Pelargonium domesticum**

Pinkerbell is a stunning regal hybrid with a more compact habit than the other lines, but full of flowers that come nonstop throughout the summer months. Pinkerbell does not require cooling, but can be grown under traditional zonal geranium conditions as long as they are kept dry.

PINKERBELL®  
Regal Geranium

# CANDY FLOWERS® REGAL GERANIUM

## **Pelargonium domesticum**

Candy Flowers bloom early and keep blooming throughout the summer - a perfect complement to your existing spring plants program. The floriferous plants come in very impressive colors and the medium habit makes Candy Flowers a real standout in the store and for gardeners. Easier to produce than other regal type geraniums, Candy Flowers will tolerate more heat once established and will initiate flowers up to 50°F. While chilling can be beneficial, it is not needed for this series to produce full, blooming plants. The versatile line is well suited to all containers from quarts to 10-inch patio planters.

CANDY FLOWERS® Bicolor  
Regal Geranium

CANDY FLOWERS® Bright Red  
Regal Geranium

CANDY FLOWERS® Violet  
Regal Geranium

# ARISTO® REGAL GERANIUM

## **Pelargonium crispum**

This series of regal geraniums has been selected for their ease of rooting and the uniformity of blooms across the colors. The plant habit allows this series to be utilized in pot sizes from quarts to 10-inch. Most Aristo varieties will continue to flower throughout the summer for consumers, making them both a high value potted plant as well as a garden item.

# SCENTED COLLECTION GERANIUM

## **Pelargonium hybrids**

Plant Source International is the undisputed leader for the production of scented geranium unrooted cuttings. Grown primarily for their distinctively scented foliage, our collection also has varieties with highly ornamental features, such as Lady Plymouth with the variegated foliage and Lemona that has a brightly citrus scent paired with the heaviest flowering scented geranium available.

# HERBS

Year-over-year, North American consumers have gotten back into vegetable gardening in a big way, and a staggering 37% of millennials and 28% of boomers have reported growing herbs indoors. Our premium vegetative selection offers high-end varieties with as much ornamental value as they have in flavor.

# GRANVIA BRACTEANTHA

## Bracteantha x hybrid

Granvia sets the gold standard for the class of strawflower. This intergeneric hybrid boasts flowers twice the size of any other varieties on the market today. These plants make stunning presentations in gallon containers and larger and are superb for low maintenance patio planters and garden beds.

# COTTAGE™

## BRACTEANTHA

### Bracteantha bracteatum

Eager to reinvent the category of strawflowers, we offer the vastly superior Cottage series of bracteantha. Combining the most disease-resistant genetics available with all-season durability, these plants mean success for the gardener. The colors are matched perfectly in production and can easily be mixed in larger containers for 4-in-1 color combinations for spring through autumn sales.

# BABY BUZZ BASKET PINK BUDDLEJA

## **Buddleja davidii**

An amazing breakthrough for the class, Basket Pink provides growers with the industry's first trailing buddleja for hanging baskets or container plantings. Create natural butterfly feeders with cascades of vivid, sugar-packed pink blooms that flower continuously for months at a time.

# CALITASTIC®

## CALIBRACHOA

### Calibrachoa hybrid

Incredibly uniform in habit and flower timing, these calibrachoa set the bar for grower expectation. Very early to flower, all varieties flower at 11 hours critical daylength and stay open and in flower under low light conditions. This daylength neutral series is a great line for retailing from early spring and continuing throughout the season.

# POPCORN CASSIA

## **Cassia didymobotrya**

Dramatic upright bloom spikes, lush tropical foliage, and surprising scent drive this attention-grabbing African perennial legume into new-found popularity. Loads of bright golden-yellow blooms emerging from glossy contrasting black buds rise well above the leaves over a long season. The actual drive, however, is rubbing the leaves to get a strong aroma of buttered popcorn. A powerful garden accent and quick grower in rich soil, reaching 4' x 5' in a single season. Deer resistant, pest-free, and attracts bees and butterflies. Available only in Canada.

# COLEUS

# UNDER THE SEA COLEUS

## Coleus hybrid

Under the Sea coleus plants hail from Canada, where students bred them at Saskatchewan University. So, what sets this collection apart from all other coleus varieties? The "wild shapes and colors" found in the various cultivars make them so alluring. Well, that and the fact that they are not your typical shade lover as most coleus are- these can tolerate sun too!

# STREAM™ LOBULARIA

## Lobularia hybrid

The Stream series of Lobularia is an incredible component plant with outstanding heat tolerance and well-controlled plant habits. They make a great addition to combination pots and blend well with other varieties. Lobularia Streams also have the garden performance to be planted as a bedding accent plant in the garden. They are great selections for all seasons, blooming early in cool conditions and continuing strong later in the season with high temperatures. Stream varieties will add a scent of spring to any planting and in the garden center.

# ESSENTIAL™

## NEMESIA

### Nemesia hybrid

Living up to their namesake, these nemesias are essential for scent in the garden. Large flowers with bold colors and intense fragrance make these a staple in the garden. And Essential varieties are the most heat-tolerant nemesia on the market today, providing endless color from early spring through autumn.

# GELATO™ OSTEOSPERMUM

## Osteospermum hybrid

The Gelato series comes from the Belgian breeder, Decock, and is marketed by our friends at Westhoff. The series has been developed with a uniformly dark eye, to be very attractive to the end consumer. These plants provide continuous flowering and give the consumer a product that they will enjoy all summer. For the grower, the Gelato series are easy to grow because of their uniformity within the colors.

# CRAZYTUNIA®

## PETUNIA

### Petunia hybrid

Consumers are welcoming the new additions to our core petunia collections with open arms and freshly prepped flowerbeds. While some of our sheer and shimmery classic shades are still bestsellers, there is an overwhelming demand to provide an even broader range of unique colors and patterns to create custom combinations. Our Crazytunia series range in unique color combinations from jammin' blackberries to tropical starfruits. There are neon brights, velvety blacks, pulsating duo-tones and bold confetti flashes.

# SURFINIA®

## PETUNIA

### **Petunia hybrid**

Surfinia petunias were the world's first vegetative series of trailing varieties and remain the number one sold petunia series worldwide. These varieties are the most durable performers we offer for gardens, landscapes, and hanging baskets that go the distance through the summer heat, rain, and humidity. These profuse bloomers are the top pick for low maintenance summer color and easy consumer success.

Surfinia Sumo varieties take petunia performance to a whole new level. These plants have the most robust habits and large bloom sizes for awe-inspiring landscapes. Consistent award winners in field trials across North America, Surfinia Sumo is the go-to series for predictable landscape performance.

Surfinia Summer Double varieties have the maximum petal-packed blooms for unique hanging baskets and container displays. These make outstanding retail displays for high-value impulse purchases throughout the spring and summer.

# HELLS PETUNIA

## Petunia hybrid

The unique neon colors and superb habits of the Hells series have created a tremendous amount of interest from growers and gardeners. With a vigorous, horizontal branching habit, these plants fill up baskets fast. And as for color, we can't say enough! The blooms are the brightest we've ever seen and completely cover every bit of the plants from side to side.

# BODACIOUS® SALVIA

## Salvia x. guaranitica

This Bodacious duo is a phenomenal new interspecific hybrid collection of garden salvias. The saturated jewel-toned blooms with striking black calyx add intense drama to the perennial garden, freely reflowering throughout the season. The dark-green foliage color does not yellow during the summer heat, keeping a solid contrast to the blooms. The improved branching creates a great tight-rounded habit. Perfect for hummingbird gardens, containers, garden borders, and modern landscapes.

# SUNNY SUSY® THUNBERGIA

## Thunbergia hybrid

Sunny Susy varieties are easier to handle than most unruly types in this class. These well-branched and fuller selections have an increased shelf life and sales window for growers and retailers. They are easy to recommend to customers for quickly covering patio lattices and fences, and are excellent climbing components for combinations paired with other vigorous varieties. We also love the suitability of Sunny Susy varieties in hanging baskets as both a spiller, as well as climbing up the hanger for added interest.

Sunny Susy varieties are also well-recognized in the industry for producing a profusion of blooms in the most intense and unique colors available.

## Vinca hybrid

Soiree is an exciting collection of heat-loving plants that retain a beautiful shape while providing outstanding coverage in containers and landscapes. Perfect carefree color all summer, Soiree Kawaii are micro blooming varieties which will light up any garden with their amazing flower coverage, vivid eye-drawing colors with deep glossy green foliage. Keeps habit all summer long, has no leggy branches, and has tons of flower power. This is the ultimate hot summer annual.

# PRISM™ WEIGELA

## Weigela hybrid

Prism weigela are bred for compact habits, small leaves, excellent branching, and dramatic foliage colors. These plants make such wonderful foliage accents in the garden or in containers, that the powerful push of blooms becomes an exciting bonus.

# NOTES

# Rooted Cuttings

THE FOLLOWING GROWERS ARE  
PRODUCING ROOTED CUTTINGS  
OF PSI MATERIALS:

## United States:

Al's Garden Center and Greenhouses (OR)

Beds & Borders (NY)

Davis Floral (GA)

DGI Propagators (MI)

D.S. Cole (NH)

Dupont Nursery Inc (LA)

Eshenshade Greenhouses (PA)

Galema Greenhouse (IN)

Gro-N-Sell (PA)

Kube Pak Corp. (NJ)

Lucas Greenhouse (NJ)

Malmberg's Greenhouses (MN)

Mast Young Plants (MI)

Meadow View Growers (OH)

PlantPeddler (IA)

Sunbelt (GA)

Weber Greenhouses (IN)

Welby Garden Co. (CO)

Wenke Greenhouses (MI)

## Canada:

Bradford Greenhouses

Colonial Florists Ltd.

Ed Sobkowich Greenhouses Ltd.

George Sant & Son Greenhouses

Greenfield Gardens

Schenck Farms & Greenhouses

# How To Order

## Cutting Availability

URCs will be available weeks 30-20. For a complete listing of varieties and current availability, check the PSI website: [www.plantsourceintl.com](http://www.plantsourceintl.com).

## Royalty

All varieties denoted with a company logo or noted as protected are patented varieties, registered for plant protection or have a breeder's fee. Propagation is strictly prohibited on these varieties.

## Claims

To receive consideration, claims must be reported to PSI within seven days of receiving cuttings.

## Minimums

The minimum order is 2000 cuttings.  
Minimum per variety: 100; shipped in multiples of 100.

## Shipping

All orders are custom cleared in Atlanta, Miami, Toronto or Vancouver. Once cleared, shipments are delivered overnight by FedEx. Freight is included in the cutting cost. For Canadian shipments: Phytosanitary fee may be added to the invoice; Government Agency Fees are the responsibility of the recipient.

## Tags

Tags for URCs can be ordered in increments of 100 per variety for everything PSI offers. Tags are required for patented varieties, but are not automatically shipped with your order. Tags for Terra Nova products are required and will be shipped to the customer.

## PSI Warranty

PSI warrants to the extent of the purchase price that all cuttings are sold true to name and shall conform within recognized tolerances. No further warranty is expressed or implied as to future marketability. Purchaser shall be limited to the invoice value at the time of purchase of any product as its exclusive remedy to breach of warranty.
