Greetings from the Swifts

A tribute to Larry Swift

The Covid Year in Review...What a crazy year (or two) it has been!

In early Spring of 2020, we were not sure we would even be able to ship any of our crops due to possible lockdowns as our Government defined essential businesses. One month later, we determined we should have planted more...a lot more.

This past Spring was also exceptionally demanding for Plugs as well as Finished (Potted) products. Most of you had a good, if not remarkable season. We are thankful for God's guidance throughout these uncertain times.

These unpredictable times also brought the passing of our beloved father Larry E. Swift (Grandpa Larry), 78, due to an abdominal blood clot.

Larry's life was the greenhouse as Mom (Carol) and Dad purchased the 15,000 sq. ft. glasshouse in 1965, at the age of just 24, from Larry's Mother and Father: Mildred and Earl Swift. Larry was ready for a new adventure.

Dad was fearless, ingenious, and hardworking. He was not afraid of failure and would try any new and untested opportunity in life or business, which was the key to his success. He was responsible for much of Swifts' growth over the years and introduced Perennials to our product mix in 1970. In addition to building greenhouse structures, Larry built countless, long-lasting relationships with customers and brokers, thanks to his outgoing and cordial personality. Dad could always find the good in everyone and enjoyed life to its fullest.

He loved to give tours of the greenhouse to visitors, but somehow it would always end with a tour of his big-game hunting room at the house. He never did seek treatment for Mom's diagnosis of his "Hunting-itis". He enjoyed his hunting & fishing expeditions with friends and took joy in traveling with family. He especially enjoyed taking his family to Iowa State sporting events.

Grandpa Larry adored his grandkids and loved spending time with them; whether it be playing pool or board & card games at home or attending their many activities. He was truly an exceptional grandfather and the number one supporter of his one "favorite" granddaughter and six grandsons.

Larry's life was spent in the fast lane, as one that spent any time in a vehicle with him could attest.

In his retirement, he enjoyed running errands for the greenhouse, dropping off donations of plants/food at the House of Compassion, making lunch runs for his kids after the closing of Carol's kitchen in 2016, and making new friends everywhere he went. He had a huge heart and was willing to share it with anyone who had the pleasure of knowing him.

Larry's motto will always be, 'Our Plants are Thrivers' and Swift Greenhouses, Inc. still thrives on details... 70 years after its inception!

Have a Blessed Season!

2021 Greenhouse Expansion

The 2021 greenhouse expansion added over 14,000 sq. ft. of growing space. This growth will help us improve our perennial plugs in the Fall and Spring seasons, as well as our Finished (Potted) product line in the Spring for our local customer base. The passive cooling and open roof system allows for optimum plant growth and amazing flowering crops.

In the Summer of 2021, we completed our warehouse extension, and the cold storage holding facilities were updated. Our improved shipping department is better able to handle the demand of processing our 50 Plug and 288 Plug products during the critical months of Spring to ensure timely handling and delivery.

Perennial Gardening Made Easier with Color-Coded Tags!

Our color-coded tag system makes it easy for your customers to select plants by height, amount of sun, and bloom date so planting is easier!

John Henry Junior Portrait Tags are available for ALL 50-Plug varieties and automatically ship in the box with your plugs. 1 tag per plug.

Split tag shipments are not available. If you desire NO tags for specific varieties, please place those items on a separate order.

Each tag has a colored background corresponding with the garden placement each plant requires. Our tags also feature specialty garden symbols for: Deer Resistant, Attracts Butterflies, Attracts Hummingbirds, Rock Gardens, & Foot Friendly.

We have also carried our color coding and symbol system into our catalog. Please see page 1 for a legend explaining how they work!

"WEEKS TO BLOOM" 50-PLUG 'PREDICTABLE' PERENNIAL SCHEDULE

← Look for these symbols throughout the catalog & list! →

The #'s inside the pot = # of Weeks to bloom for 550+ 50-Plug varieties.

Will bloom in the # of weeks listed in a 4½" to 6" (gallon) pot if grown at the temperature parameters noted below.

REQUIRED TEMPERATURE PARAMETERS for "PREDICTABLE" BLOOMS

Planted from January 1 - March 15. If planted after March 15, reduce Weeks to Bloom by 1-2 weeks. (Except those marked with a light bulb.)

Week 1:	68-70° nights	68-70° days
Week 2:	68° nights	66-68° days
Week 3:	65-67° nights	65-66° days
Week 5-7:	62-64° nights	60-63° days
Holding Temperature:	50-55° nights	55° days

This is the fastest method we have found for growing finished perennials. If you want to grow colder, remember every 5°F drop in temperature increases your crop finish time by approximately 1 week. Please note, some varieties indicate 2 or more plugs are required for gallon pots.

Items with light bulbs need night interruption light **AND**

warm day & night temperatures of at least 65-70°F constantly to grow and bloom in # of weeks stated.

They cannot be grown cooler until they start to bloom.
