Let's get
Started!

Questionnaire
with graph paper
inside.

The foundation of every growing operation, Carlin Horticultural Supplies provides turnkey Greenhouse solutions for those who are just beginning a growing operation, or have been growing for years and need to expand or update. Carlin partners with multiple greenhouse/ growing equipment manufacturers to identify, design and implement the best plan for your growing business.

Did you know Carlin has their own line of greenhouse structures and cover sheds?

The ProGreen Plus™ RoundHouse is a fantastic structure that comes in 16' or 20' widths. They are manufactured with Gatorshield tubing that can be used for year-round growing, high tunnel production, greenhouse or overwintering. The round shape sheds rain, snow and wind, and can be covered with single layer poly, inflated double poly or PCSS (with additional framing). The RoundHouse is shipped with Carlin's exclusive LockUp™ purlin bracket. The RoundHouse has optional endwall packages, doors and additional purlins available for added strength and PCSS covering if desired.

ProGreen Plus™ CoverSheds can be used as weather cover for just about anything including salt, mulch, soil, compost and equipment. All CoverSheds are shipped with our exclusive purlin LockUp™ bracket. CoverSheds™ are built on a foundation wall constructed of concrete walls, concrete blocks or wood (foundation wall material not supplied). Endwall package and poly film covering included (many options available). Optional accessories are available such as truss packages and roll-up sidewall systems.

Let's get Started!

Fill out the questionnaire inside this brochure to get your project started. It includes a few general questions, as well as a graph section to provide estimated dimensions. From there, we will find the best structure to fit your needs.

Greenhouse Providers

Rimol Greenhouse Systems is a first-class commercial greenhouse manufacturing and distribution company, shipping greenhouses all over the United States to farms, garden centers, nurseries, educational institutions, homesteads and more. Most popular structures include the Nor'Easter, one of the strongest free-standing greenhouses on the market. The Matterhorn, an attractive and rugged traditional style gutter connected greenhouse. Rimol High Tunnels are available in multiple widths and lengths, are increasingly popular for commercial growers, as well as independent homestead farmers, and are a proven necessity for high-yield crop production.

Hookset, NH

PROSPIANT

Prospiant specializes in the design, engineering, and construction of greenhouse solutions fit to your specific

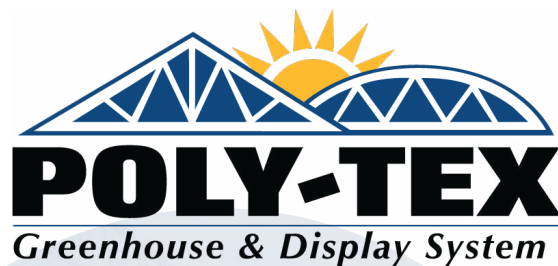

growing needs. The Vail is the workhorse of the Prospiant product line. Strength and versatility make it perfect for crop production, retail, shipping, headhouses and more. The Windjammer is a ground-to-ground, freestanding greenhouse for finishing and multi-tier production. Use it as a stand alone house or add double bolted ground stakes and heavy-gauge, walk-in gutters for an alternative to "traditional" gutter-connected designs. The Zephyr is an ideal choice for natural ventilation and dehumidification. Its curved roof shape and peak vent allow heat to escape from the top of the house, eliminating the need for exhaust fans and vents, even with the gutters full of snow.

Cincinnati, OH

Greenhouse Providers

Poly-Tex manufactures greenhouses, high tunnels, retail structures, shade structures, plant displays and accessories. Poly-Tex products are manufactured using American made Allied Gatorshield® steel tubing. Poly-Tex is best known for the Garden Mart, which combines exceptionally easy setup with great standard features, superior strength and customer comfort. For new growers, the Expansion Mansion is an economical structure that makes expansion and upgrading simple. The Vertex is a new peak shade structure that utilizes a snap button frame and bungee attachments. The Vertex will give you shade while keeping that open air feeling.

Garden Mart

Expansion Mansion

Vertex

Castle Rock, MN

Westbrook develops some of the most effective growing systems, including the first curved glass greenhouse (Apex and Skyline). Westbrook designed the Skyline system for maximum light levels, fully open venting, as well as being strong enough to carry high snow and hanging crop loads. Inspired by the Dutch/European growing industries, Venlo greenhouses provide taller sidewalls to promote a healthier, more stable and uniform growing environment. Westbrook's freestanding greenhouses provide maximum growing space and give the ability to maximize interior height. This allows for large doors, overhead crops, watering booms and an improved environmental control.

Freestanding

Beamsville, ON Canada

Greenhouse Equipment

BENCHING

DuraPlas®

(Southwest Agriplastics)

The Dura-Bench greenhouse bench tops constructed of high grade polypropylene plastics that are long lasting, UV resistant, lightweight, moisture resistant and increase airflow.

Structural Plastics

SPC Retail® recycled-plastic shelving and display units are versatile and discreet. While resolutely performing the function your store requires, they subtly yet distinctly enhance the overall personality of the space.

CONTROLS

Bartlett Instrument Co.

Manufacturer of easy-to-use instrumentation equipment and controls for the greenhouse market, creating a tradition of providing quality products and excellent support of those products.

Link 4 Corporation

Software and environmental controls for growers wanting to optimize their greenhouse production and reduce operating costs; enabling management to every aspect of the greenhouse from anywhere.

Wadsworth Control Systems

Integrated climate systems including controls, ventilation, and curtains and light deprivation systems.

COVERINGS

Amerilux International

Multiwall and corrugated polycarbonate sheets, PVC liner panels, HDPE panels, and acrylic sheets. Products include Polycarbonate, Plastic Sheets, Lexan™, Thermoclear™ and Verolite™.

Berry Global

Berry produces high-clarity tri-layer film that combines maximum protection with ease of installation to ensure long-term product quality, whatever the season.

Greenhouse Equipment

COVERINGS

Poly-Ag Corporation

Specializes in the manufacturing of an extensive range of advanced films for Agricultural & Horticultural applications.

RKW

RKW manufactures efficient greenhouse films that protect plants from the effects of frost, wind and rain to ensure consistent higher quality.

Warp's®

Warp's® provides acrylic safety glazing, plastic sheeting, vinyl rolls and more to repair and replace sections of greenhouse covering.

EQUIPMENT

Metazet™ (FormFlex®)

Metazet develops fully customizable cultivation systems, including the FormFlex® cultivation gutters that provide even and efficient watering, optimal air circulation and lower risk of disease and pests.

Pack Manufacturing

Pack Manufacturing provides a full line of potting soil mixers, potters, flat fillers, conveyors and more. Custom equipment and solutions are also available.

HEATING

BioTherm

Advanced water temperature control, Dissolved Oxygen infusion, cutting-edge dehumidification, cooling, and CO₂ enrichment systems helping growers achieve optimal plant health and efficiency.

Modine®

Modine Manufacturing Company is leading the way in thermal management; providing the commercial and industrial markets with trusted systems and solutions to manage heating and cooling and improve air quality.

Greenhouse Equipment

IRRIGATION

DEMA®

DEMA offers a wide variety of products to fit applications from greenhouse, hydroponics, chemical transfer and water treatment. MixRite proportioning pumps dispense nutrients in a consistent dilution regardless of water flow changes.

Dosatron®

Dosatron provides non-electric, water-powered chemical dispensers and dilution equipment, providing increased quality and makes the process of blending and dispensing nutrients easier and more accurate.

DRAMM

Dramm produces high quality, technical growing solutions including watering tools, irrigation systems, foaming equipment and chemical application equipment, fogging systems, watering carts and retail watering products.

H.E. Anderson Company®

Reliable, accurate chemical pumps for the horticulture industry. Professional grade water treatment equipment, including complete injections systems, chemical pumps and controllers.

Netafim™ Irrigation

Netafim is the world's leading drip irrigation technology company supplying multiple industries with smart drip irrigation systems that help with water usage and better yields at a higher quality.

LIGHTING

IGE-Hydrofarm Commercial

Leading manufacturer of controlled environment agriculture equipment and supplies, including high-intensity grow lights and climate control solutions.

P.L. Light Systems

P.L. LIGHT SYSTEMS

P.L. Light Systems offers a complete range of innovative horticultural lighting products across a variety of technologies. Designed to deliver optimal lighting performance for plant growth and are built to the highest quality.

Greenhouse Equipment

SHADE COVERINGS

Ludvig Svensson

Functional climate and screen solutions that control humidity, temperature, light and UV radiation, creating excelling conditions for better and greater production in greenhouses.

STRUCTURAL

HC Quality Doors

HC Quality Doors provides retail storefront entrances along with hollow metal and wood exterior and interior openings. Total end to end solution for your commercial door, hardware and accessory needs.

Sonco Pipe & Tube

The preferred choice for greenhouse and shade structures. No other tube can offer excellent tensile and yield strengths, combined with unsurpassed corrosion protection.

VENTILATION

ACME Engineering

Ventilation systems for greenhouses and live plant growing operations including DC/DCA and DDPV Fans, Turbulator™ Stir Fans and Kool Gel Evaporative Systems.

Advancing Alternatives®

**ADVANCING
ALTERNATIVES**

Advancing Alternatives specializes in Touchscreen Environmental Controls, Rack & Pinion Motors, Curtain Motors, Natural Ventilation and Heating, as well as Rolling Curtain Systems.

Hessaire Products

Hessaire produces ventilation, exhaust and circulation fans for greenhouses and growing structures.

J&D Manufacturing

J&D Manufacturing builds greenhouse fans, ventilation solutions, and light deprivation systems. Their complete line of galvanized, poly, and fiberglass exhaust fans that is perfect for any greenhouse.
